Baby Loves Sports: A High-Contrast Action Book

Synopsis

It's never too early to look at the world, and the things that you and your baby will enjoy, together. Making connections between images on a page and the real world is an important building block for your baby's communication skills; and these simple, solid-white sports figures, paired with bold and colorful sports balls, provide a great high-contrast experience for young developing eyes.

Book Information

Board book: 20 pages

Customer Reviews

Baby Loves SPORTS is a board book from Duo Press. This is a "high-contrast" book. (It is interesting to read the research on the value of high-contrast books for babies if you are not familiar with what this is.) I have read a few high-contrast books with my baby and found this one to be of good quality all around. Each page has a different sport featured. One page will have a player and the opposite page will have the ball that goes with that sport. Black and white are the dominant colors; however, there are some dark colored background pages too. My baby boy (11 months) likes touching the pages and reaches for the balls. He has enjoyed looking at it multiple times. This book would make a nice baby shower gift or to add to your baby's library. This book was sent to me by the publisher for my review, these opinions are mine. Thank you.

My 18 month old LOVES this book. It is so basic, but it is his favorite! A fun introduction to sports!
High quality!

Nice images, no words. My one year old did not like it. I am going to add words with label maker.
