I bought this for my niece as a gift. She loves it. The illustrations are really good she likes to look at the pictures even when someone isn't reading it to her (she can't read yet) this is perfect if you want to read some fun and interesting stories for a baby. If you are looking for something for older kids you should probably just get the regular Curious George books. These are made specifically for very

young children, but they are excellent. I was very pleased with my purchase.

My two year old daughter just discovered Curious George's cartoon and loves it. So we decided to get her these books for Christmas. The stories themselves are fun and simple but they push her a little to understand new things and ideas and she really enjoys them. The books are a good cardboard and I don't worry about her dragging them all over the house. I think they're really great!

These books have been very durable so far...and if you have a 1 year old you know how they are on books! My son LOVES George! These books are the perfect size to put 1 or 2 of them in your purse so you can always have George with you!

I bought these as party favors for my son's third birthday. I liked the idea of books as a favor rather than another toy. My son loves Curious George and these books touch on things that kids are learning and/or know in a fun way. Of course, at the price, it only made sense because the party was small and two sets was enough. And my son enjoyed the couple books left over.

The books were only OK - my grandson is really not too interested - yet he loves Curious George -but the box was really bad - usually little boxes of books have a little handle for little tots to carry around - this box did not and fell apart within a few weeks

This is a truly wonderful set of books for a young toddler. My kiddo is 14 months and he cannot get enough of them. Especially the Are You Curious? book. He goes nuts for it! All four books are great for learning. The 1-10 counting book is really fun since you also count down, which most counting-type books don't do.

I am a Curious George fan dating back to my childhood. I love to read. I bought these books as a gift for my great niece. They are durable and come in a case that makes them easy to store. The price was good, also.

We love the books, but our 11 month old managed to take the yellow part of the snap off and stick it in his mouth! We had to get it out immediately... We are unsure about how he got it off and we can not get the other one off without messing it up... I believe he was trying to open the box himself. As for the books, the art is wonderful!
