This Rocket

Synopsis

Blast off for rockets! This colorful celebration will satisfy burgeoning astronauts with a survey of rocket planes and spacecrafts. From a Fourth of July firework rocket to the space shuttle Columbia to the rocket that landed men on the moon, rich paintings compare and contrast various types of these remarkable fire-powered flying machines. The simple text and pictures can be enjoyed by the youngest preschool enthusiast, while also appealing to older children who can read by themselves. In-depth endpapers showcase specific models and also detail the famous Apollo space mission.

Book Information

Hardcover: 32 pages

Publisher: Farrar, Straus and Giroux (BYR); 1st edition (September 7, 2005)

Language: English

ISBN-13: 978-0374374846

Product Dimensions: 10.8 x 0.3 x 8.3 inches

Shipping Weight: 10.4 ounces

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (5 customer reviews)

Best Sellers Rank: #844,472 in Books (See Top 100 in Books) #164 in [Books > Children's Books > Early Learning > Basic Concepts > Opposites](#) #288 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Aeronautics & Space](#) #325 in [Books > Children's Books > Cars, Trains & Things That Go > Planes & Aviation](#)

Age Range: 3 - 6 years

Grade Level: Preschool - 1

Customer Reviews

I thought this was a very nice book, with lots of facts, details and bright photos. I bought it for my 3 year old nephew, knowing he was not ready for all the factual aspects but would love the illustrations. He opened it on Christmas morning, and according to his mother, did not open another present but spent the rest of the morning pouring over this book. He loves books and is especially into rockets. I recommend this book for anyone who likes rockets and wants to read more about them.

I now have the entire series of Paul Collicut books, this was a pleasant surprise, the 6th book in the series which proves to be very entertaining and very much enjoyed by my [...] He can read the

whole book alone! Big beautiful graphic pictures enhance the enjoyment of reading this book!
Enjoy!!

This book is a fabulous treat for any 2-4 year old rocket lover. The pictures are wonderful, bright and attention grabbing. The one fact per page is good, though at three, 2-3 facts would have worked as well for him. The more detailed information inside the front and back covers has led to some interesting conversations. And he loves seeing pictures of the space shuttle inside.

My friend gave us This Rocket from a library sale. He memorized the books when he was 3 and I searched to find the rest of the collection. They are good at teaching kids different adjectives and very simple. He's 4 now and "reads" it to his 9 month brother. Priceless!

If you and your child love rockets well this is well illustrated and a cool briefly worded book
