I wanted to write this in response to JsMommy's comment about this book's ability to teach you to play piano. I had a book like this when I was first learning how to read. I had no musical background or even access to musical instruments, but I caught on to it pretty quickly. I loved that book so much, that I have been scouring the internet searching for something like it to get for the little ones in my family. This book will not teach your child to play piano, but it will certainly foster interest in a child with unknown musical talents. Furthermore, it has been proven that pairing musical notes with colors, as this book does, can help a child attain perfect pitch. I went from having little to no interest in music as a child to being a music educator. I would recommend this book for any child. It's a fun way to pick up familiar children's songs. You may also discover if you have the next Mozart in your family. :)

This is such a cute little piano book. My son loves it. He sings along to all the songs even though he can't read the book and pretends to play what he can. Eventually he may be able to play them correctly, but he loves just spending time playing the keys and hearing himself sing. I'd highly recommend this to anyone with a toddler.

Book has a small but good selection of songs. My grandson is very musical but this book will not keep his attention. The keyboard is numbered and color coded so that you can play the song as instructed on the page. This one does not do that. It plays the entire song after pushing just the first key. Would not recommend this product.

My daughter received this as a gift when her little brother was born over a year ago and it is still one of her favorites. It is easy for little ones to figure out, and they feel very proud when they play each song "all by myself." Younger toddlers will have fun just pressing the keys. Highly recommend!

My 4 year old absolutely loves this piano book. It has challenged her to focus on colors and patterns and is so proud of herself every time she learns the song. This is kind of hard for even me to follow sometimes so I give her props! You have to get this knowing it's not going to teach your kid how to play the piano or anything.. but would someone really expect that?!

Today, while cleaning out a box, I found a page, with keyboard, of this book. We have had it for years. My middle school grandchildren jumped on it when they saw it. We all love this book. The kids used to see who could memorize how to play the most songs. The one we had was very sturdy and after at least 10 years still has the same battery. It is fun, durable and has broad age range appeal. I am buying a new one for a seven yr old grandchild.

This book/toy was recommended to me by a piano teacher as the first step towards actually playing a real piano. My son enjoys practicing the songs, and I think the benefit is learning to "follow" a song, but the only reason I wouldn't give it 5 stars is because the sound is still a long way off the the sound of a true instrument. It is no substitute for a real piano, but it is a great low-cost way to see if your child shows interest in playing an instrument and the practice it takes to play a satisfying rendition of the song.

I liked the selection of songs in this piano book. Wanted to buy a new one, but only was able to see similar product with different selection of songs. Thus I had to buy a used one, which was OK for home use, but not for gift, due to multiple wears. This is why I rated three, not five stars.
