Numbers 0-25 Flash Cards

Synopsis

Numbers 0-25 Flash Cards can help your child learn numbers, counting, addition, and subtraction. Each card presents a number and either the number word or a set of colorful pictures representing the number. The Parent Card suggests activities to help your child learn numbers, addition, and subtraction.

Book Information

Cards: 56 pages

Publisher: School Zone Publishing Company; Crds edition (January 1, 2005)

Language: English

ISBN-10: 1589474783

ISBN-13: 978-1589474789

Product Dimensions: 1 x 3.2 x 5.5 inches

Shipping Weight: 0.3 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (212 customer reviews)

Best Sellers Rank: #1,373 in Books (See Top 100 in Books) #1 in [Books > Children's Books > Activities, Crafts & Games > Games > Card Games](#) #7 in [Books > Children's Books > Education & Reference > Math](#)

Age Range: 4 and up

Grade Level: Preschool and up

Customer Reviews

I've purchased several flash card packages from School Zone now, and they're just great! The cards are about the same card stock as playing cards, with one side shiny/laminated and the other side not. One thing I noted was that despite the "flimsiness" of the cards that other reviewers mentioned, these cards can take a beating - my two toddlers have bent, squashed, and thrown around these cards and amazingly none of them have torn! Even if they did, for less than \$2 a pack, it's not a problem. There are actually two separate counting decks included in this pack. The shiny side on the first set features bright, colorful images, while the dull side features the number and the word in a soft blue color. The shiny side on the second set features the numbers in bright colors, while the dull side features the words in a soft blue color. There is also a parent teaching card, a card with information regarding addition and subtraction, and two cards that show a plus, a minus, and an equals sign (The plus and minus is on one card, while there are two equal signs on the other card). There are more than 50 cards in a deck, including the teaching cards, the symbol cards, and

all the number cards. We pack these cards with us when we go to restaurants for the kids to learn while waiting - it definitely keeps them busy until our entrees arrive! Highly recommended!

While these flash cards are sturdy and brightly colored to capture my child's attention, they pose one major flaw. Each number >5 is grouped into sets of 5 both physically and via color. This greatly confuses my child when I ask him to count the pictures on the flash card. For example the number 8 has 5 orange hats in one group and then 3 green hats below. When I ask him to count the pictures he tells me 5 hats and 3 hats rather than continuing to count to 8. This type of grouping would have been better served in the addition themed pack, not the numbers 0-25 pack. It wouldn't bother me as much if the "5" card had all the same color cars, as numbers 1-4 are all identical pictures (number 2 has two same colored bees, 3 has three blue airplanes, 4 has four yellow fish). For whatever reason the number 5 card is the only card in the entire pack to have five object with different colors (1 red, 1 blue, 1 orange, 1 yellow, and 1 green car). This makes the statement, "each number greater than 4 is divided into groups of 5, false, rendering the cards useless to us. As a math teacher I cannot understand what the manufacturers were thinking. Good concept, horrible execution!!

I am very pleased with these cards. The paper is no thinner than I expected--similar to playing cards. After using many flash card sets through 3 kids and now teaching a great niece--these are exactly what I wanted. You actually get two sets--one with the number on one side and pictures on the other. The other set is just the numeral on one side and the numeral name on the other. I bought these to not only use as normal flash cards but to use for outside chalk games. At this price, I will be ordering another set with my next order just for the outside games. I would highly recommend this set if you are looking for cards to teach the names and meaning of each number.

If you're getting flashcards for the first time, try single objects first and later get these. These flashcards are still advanced for my little ones. For example, the one on the cover shows 5 cars. My little ones want to say car instead of count to five. Soon they'll get there. I'm just passing on what I've learned about using flashcards. Another point on flashcards is that they're fairly disposable. When you get several packs, expect repetition. They all seem to feature the same set of objects. My children like using flashcards so much that it can drive a person almost crazy. Lately I've upgraded them to Google Images, where I'll type something like "car" or "fish" or "apple" and bring up the pictures from the Internet. They love that game beyond words - much more fun than flashcards.

I really needed a new set of number cards for my daycare, after searching for a similar set I had, I finally found this set. I really enjoy how sturdy and easy to hold this set is. When we are doing fast counting it is easy to slide a card from the front to back. They do not stick which is really nice too. The kids really like that there is a picture to go with the number and have fun counting how many of that picture there is. The numbers and words are very easy to read.

These were great addition to our son's 2000+ flash cards collection! Each day we used between 200-300 cards for our son's daily learning routine. These cards were reasonably good quality & fairly competitive pricing! Colors are bright. Might be a good idea to have real pictures/photographs instead of cartoonistic.

My Two year old broke into these and tried to eat them. But he can also identify 1-10 and is working on 11-25 so it's a win. These wonderful brand new cards look like they are 30 years old now that they've been in the hands of Toddler Tornado, but it appears they will last another 30 years :) Got these in a bundle with Colors and Shapes and The Alphabet (and one other that my sinus infected brain won't let me remember).
