National Geographic Readers: Weird Sea Creatures

Synopsis

Did you know that the deep-sea anglerfish has a glowing fishing rod attached to its body, or that the barreleye fish has a see-through head? See these wacky creatures and more in this brilliantly illustrated book that explores the strangest creatures under the sea. This level two reader uses easy-to-grasp language that will keep children intrigued and learning on every page. This high-interest, educationally vetted series of beginning readers features the magnificent images of National Geographic, accompanied by texts written by experienced, skilled children's book authors. The inside back cover of the paperback edition is an interactive feature based upon the book. Level 1 books reinforce the content of the book with a kinesthetic learning activity. In Level 2 books readers complete a Cloze letter, or fun fill-in, with vocabulary words. Releases simultaneously in Reinforced Library Binding: 978-1-4263-1048-5 , \$13.90/\$15.95 Can

Customer Reviews

This National Geographic book we bought in a local bookstore and it is amazing!! Despite the fact I am an adult I love reading children books with my kids. This one is so colorful my kids adore it!! have also bought this book for my older boy (it has stunning images too and great really good info):Sharks: Kids book of fun facts & amazing pictures on animals in nature (Animals of The World

Series)Thank you Laura for this book!

I got this for my 10-year-old daughter who is interested in all animals. Living right in the middle of the country, we especially like to learn about sea creatures because our chances of actually seeing any are slim. This is a really great little book with some really neat pictures. Although I disagree with some of the politics National Geographic seems to sneak into their publications from time to time, this one was pretty neutral. My daughter has read it over and over and loves to show me the pictures and read to me interesting facts about all the fishies.

I purchased this book for my son who is diagnosed with Autism and aspire to become an Ecologist in the area of Marine Biologist. This book has very large and bright pictures and colors. It is written for young people and only has a few pages. Although I son like the book, even with the text bubbles and large print, he wished that it were more information to review. I really liked the pictures and enjoyed the information included. He thought it was a nice refresher. They were like small posters for him as was the NG Kids Wild Animal Atlas. He wants me to try and find the adult versions of these books. I am still looking.I would refer these this book to others.

The colors and pictures in this book are wonderful. As an adult it makes you not want to swim in the ocean, but my son is fearless and could care less about that. He soaks up all the information and really loves the pictures. I have yet to be disappointed by a National Geographic for kids.

This is another great nonfiction book that's easy to read. Children love to see something new. You can use this book to teach about text features such as the table of contents, maps, captions, etc. You can't go wrong with National Geographic.

As always, National Geographic has done a great job with delivering a kid-friendly introduction to obscure animals. It has all of the important features expected of informational texts. This will serve the purpose of introducing informational text features to my students in our ocean-themed classroom.

My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones. The "pre-readers" level books are extremely simple & great because she memorizes the words &

can "read" it herself. We love the more advanced ones too, because there is more information to talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable & pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

We own quite a few of the national geographic readers and we love them all. They are appropriately laid out for young readers, my daughter loves the riddles/jokes and she loves learning interesting facts about the animals and sharing them with the family. I am very pleased with this purchase and will continue to buy others in the series.
