## Synopsis

What can you make with one oval, two circles, and eight triangles? Just ask three clever mice--who even find a funny way to trick a sneaky cat. Ellen Stoll Walsh once again proves that she's a master of concept books in this celebration of shapes, color, and innovation.

My almost-3-year-old son and I came across this book for the first time during library story time. My son talked about it so much afterward that I decided to check it out from the library. He calls it "the scary mice book" because, in the story, the small mice use shapes to make bigger versions of themselves to scare away the sneaky cat. He knows his shapes, but this book is great for reinforcement and to show what things can be made when shapes are put together. When my son plays with his rubber shapes he likes to try to make the things the mice make in the book. I would imagine it would also work well for teaching a child who doesn't yet know his shapes.

I love this author's first two 'Mouse' books, 'MouseCount' & 'Mouse Paint'. Both books had a natural, believable flow that reflected the way young children think and learn. This one seems more forced, like she was responding to demands for another basic concepts book rather than writing it on her own. I especially dislike that the shapes are used to represent things- that's a skill of older kids & quite different from the simple, incidental learning that occurs via the mice in the first two books. The

art is still great, but overall it missed the mark- it was younger child structured but possessed older child concepts- feh.

I originally bought this book when I was pursuing my degree in early childhood ed for a project. When I was finished I ended up taking it to my classroom & it was instantly a HIT & has become a classic. They absolutely love it. An excellent addition to any child's or classroom's library.

I am a teacher and used this book in a unit where one of the math objectives was identifying shapes. The kids loved it, and there were lots of activities that we did with shapes based off of the characters in this book.

Ellen Stohl Walsh as a children's author and illustrator. Her stories are delightful and the illustration colorful. I have bought many of her books throughout my career as a Kindergarten and preschool teacher and the students loved them too! I will now introduce my grandchildren to this lovely author/illustrator !

I am an Author with my twin sister Karen. We have written one on shapes as well. Your book was wonderful! I work with children, and this book is a great way to introduce shapes. FUN, and ENJOYABLE! Learning made fun!!

This is a great resource for parents and teachers wishing to introduce geometry concepts. We recently used this book in a CPIN math training for educators. Highly recommended, along with Mouse Count, to address new CA Preschool Foundations.

I love this book! I used to review shapes with my PreK students then in small groups, i gave each child an assortment of shspes in different sizes and they made their own shape pictures!! They were so creative and Im very glad I got this book.
