# My First Bilingual Book-Animals (English-Chinese)

## Synopsis

Guaranteed to enrich a toddler's vocabulary, this simple and fun series of bilingual board books is ideal for helping children discover a foreign language. Highlighting more complex concepts that go beyond colors and numbers, titles in the series feature animals, fruit, home, and vegetables. This collection combines photographs, bright illustrations, and dual-language words in clear, bold text. Suitable for both individuals and groups, these books are a child's perfect introduction to exploring other cultures.

## Customer Reviews

They are simple books for kids. Nothing extra special but very easy for a child to learn from and even read themselves. Got this for my little cousin and they really like it. I give it 3 because its a good starter book and since I bought used, I'd say its not a good deal. As a Brazilian-American it can be difficult to find these kinds of books for the little ones but this is a good start. Not great. This is the second time I've purchased this brand before. I will probably buy again. I wish the books were bigger though and had more photos. This one just had random [but basic] animals and only 3 insects. It could have a better variety of animals.

Awesome book! Bought this along with a few of the others in the series for our daughter's second

birthday. The pictures are bright and colorful and the words are fun to learn! Would definitely recommend.

Very nice book. My son likes it he just turned 2 and can tell you a few of the Animals. It came in great shape just in a box. I did expect it to be a little bigger or thicker but it seems fine as long as I can make sure it doesn't get chewed!

So unfortunately they lumped the reviews for all languages together. This is for the Farsi-English animals book. I got this for my 8 month old nephew, who's parents are native Farsi speakers, both because there aren't a lot of Farsi language board books available for early reading and also his parents want him to learn English (and they will be learning along with him). The book is ideal for the 6-12 month age range. As a speaker of both languages, I think they did a good job with their animal choices and word choices (no strange sophisticated words, e.g. they stuck to hippo instead of hippopotamus). Overall very pleased!

I really like all of the "My First Bilingual" series board books. We've checked out several from the library...about musical instruments, fruits & veggies...and now own a few in French-English and Arabic-English. Each page contains just one vibrant photo or drawing that really pops with detail and color. I don't expect my baby to read the bilingual words but believe every bit of exposure to written and spoken words is important for future literacy. My little guy is only 8 months old and already loves books and holds them properly. Books like these entice little ones to look and look...and I can imagine him coming back when he is older, wanting to learn the vocab too!

This could be done so much better in flash cards. There's no story. It's just pictures and labels. The problem is, there is English and Korean, but not a pronoun citation guide for those that can't read Korean writing. It has multiple pictures and things on each page, so your child may be confused as to which one you may be pointing at.

The book is smaller than I expected. The pages are thin but the entire book is kind of buckled. Unless you know how to read Russian, there is no way of figuring out how to read the words ... They are written in Russian and English and that's it. Pictures are big and bright, that is why it even got any stars.

Overall it's not a bad book, at least all words spelled correctly and images are nice and big.

However, I'm giving it 3 stars because:- It looks like pictures of animals were taken from various sources via google and horrible filter was applied to keep it away from copyright. At least that's what comes to my mind after I read it.- There is no clear structure of why certain animals have whole family represented and other not- There is no sense of scale, at least loose scale. For instance, adult cow and adult horse take half a page and baby lamb on the next page takes the whole page.
