## Customer Reviews

This is a strong course for the motivated learner keen to get a solid grounding in the basics of Mandarin Chinese grammar and vocabulary in order to continue their studies at a higher level. Someone who is more interested in quickly learning situational language and useful phrases for travelling or for business would be better served by a different course more focused on their particular needs since the vocabulary given in this one is quite general. There's another book with the same title and publisher, but by a different author (K Qian). That book is simpler and more

suitable for the casual learner wanting to learn Chinese for travelling, but it doesn't reach as high a level of Chinese as this one. But then again, neither is it as hard going! Back to this one: there are no Chinese characters in the book. To learn these, it would be useful to buy the companion Chinese character version of the book, which gives all the texts and grammatical pattern sentences, but not the grammar explanations, in Chinese characters and teaches you how to write the 700 plus characters introduced. That's available only directly from the authors I think. Unfortunately, there aren't any cassette tapes currently available for this book so it's not really suitable for someone learning completely by themselves unless they already have a good knowledge of Mandarin Chinese pronunciation. Nor are the answers to the exercises given. So it's more suitable to use with a tutor or as supplementary reading for someone attending a Chinese class. I have two quibbles with the book. Firstly, the grammar explanations are a bit dryly written so they are not always easy to understand. Secondly, the lengths of the chapters vary too much.
