Big Cats

Synopsis

The grace and power of big cats—lions, tigers, leopards, jaguars, cheetahs, pumas, and snow leopards—are captured in full-color photographs and a text that explores how they hunt, care for their young, and rest in their varied natural habitats. The combination of action shots and the author's practiced, informal style will win the attention of young readers, with whom Simon charges the future of big cats. C. Customer Reviews

Seymour Simon's book "Big Cats" is wonderful introduction for children to the world of the big cats. Children will love the huge, full-colour photographs of these gorgeous felines as they learn about lions, leopards, tigers and more. Written in terms that the young can quickly comprehend, this book presents interesting insights into these cats of the wild and makes learning about these animals a delight.

Seymour Simon has consistently interesting early childhood nature/science books for children. This is another example of a topic sure to intrigue the most die-hard video game addicted first grader. This will hold the interest of most boys. Very good information and pictures on the big cats, African lions, cheetahs, tigers, etc. Good educational tool to help children to put all the pieces together of

animals they already have some knowledge about. Teachers and parents can use the pictures as a springboard for children's artwork. Nice book, like all of Seymour Simon books that I've seen.

As a teacher I'm always on the look out for books that my boys will like. They love animal stories like this one and Seymour's alligator book.

While I was aware that this book was used, I was disappointed that the binding was broken and the plastic library cover was taped directly to the book. All of the pages were intact though. I won't buy used on books again.

You would be mistaken if you think big cats cannot purr. They can. But not all big cats can roar. In fact, three cannot roar: puma, cheetah, and snow leopard. The seven "big cats" are tiger, leopard, lion, jaguar, puma, cheetah, and snow leopard--and they all purrrrrrr. Seymour Simon provides interesting facts like this in his two or more-page spread about each Big Cat. Let's go back to those roars for a moment. When a lion roars, creatures (including people) can hear that roar up to five miles away. No wonder we show extreme respect to that magnificent animal. I once read a customer review on concerning another of Simon's animal books. The person stated that captions for each picture would be nice for her and her child. What I discovered in "Big Cats" is that each animal is the focus of two or more pages: one is a photograph, the other is a page of information. Why is a caption necessary if an entire page is about the photo? I think she wanted something quick per photo. If so, Simon's Level I readers still do not have captions, but they do have just a couple of sentences per page--in essence a caption. What I find with Simon is that once you have read one of his books in a particular series, you become attached to his writing. Simon is an excellent science writer of every kind of science and writes mostly for elementary children. "Big Cats" is written on a fourth or fifth grade level. The back of this book says he is author of over 100 science books for young readers. Actually, that was 1991. In 2007 he has over 200 books to his credit. Here are some things you will learn in "Big Cats": the leopard likes to drag his kill up a tree for safe storage from other predatory animals. There is a photo to prove it. A cheetah works alone, uses his burst of speed up to 70mph, eats as much as he can right then, and leaves the kill because he is too exhausted to guard it. A cheetah is the only big cat without large canine teeth and often loses cubs to predators because she has difficulty defending them. One of the many things I appreciate about this book is Simon's fierce dedication to animal and habitat preservation. His last page is devoted to this topic through its young readers. Raise up a child the way it should go....Whether it is purring,

killing, raising young cubs, losing its natural habitat, Big Cats have much in common. According to Simon, it is up to us to make sure they continue to have an existence.

Bought this as a gift for my daughter's friend who loves big cats, and she absolutely fell in love with the pictures throughout the book.

Beautiful book! Speedy shipping! We will enjoy the pictures, & reading this one for a very long time.

This book was in poor condition. I know it was used but the cover has creases in it and it looks badly worn. I wanted to add it in my classroom collection of Seymour Simon Books but I can't.
