Age Range: 4 - 8 years

Grade Level: Kindergarten - 3

## Customer Reviews

Bought 3 of these books for a recent plane trip with my 2 1/2 yr old son along with a travel tray. The books are smaller than I expected, but perfect size for carry on bag and toddler hands/lap. When you take the staples out of the book they have a 2 page "scene" to place all the stickers, and it is laminated so the stickers can be removed and placed again. Kept my son occupied for periods of time on the plane. Since I ordered with other items and got free shipping, I think the \$1.50 for each one was a fair price.

This little book has a construction scene on the inside with four sheets of stickers, including lots of trucks and diggers, as well as workers and construction signs. While I agree that these stickers are really not re-usable, my boys absolutely love these sticker books! What I do is remove the sticker sheets and make a copy of the construction scene on my printer -- which measures about 5-1/2 by 8 inches -- that way my sons can make multiple scenes. For a dollar-and-a-half, I think it's a great

deal! (Funny how differently people perceive the value of something!)

I blame myself partly for not checking the dimensions of this book; however, I don't think knowing it was small would have bothered me if it was quality. My 2 year old nephew had this on his Christmas wishlist. I was surprised about the low price, but once it came in the mail I changed my mind and decided that the price is way too much for what this is. It's basically 2 pieces of paper stapled together with a few stickers and a construction scene. Super small, super thin, not something I'd ever recommend. I actually felt embarrassed to give it to him on Christmas (thankfully it came with plenty of time for me to buy him several other things to go along with it).

I was very shocked to see how small this was when it arrived. It is not worth \$2. I ordered two different ones as a birthday present and had to desperately search for something else to add to them as it was far too small to give as a gift. The pictures were also not that vibrant as you usually expect from toddler stickers. Not impressed!

We love these little sticker books! This is a very small booklet that you open up to the "construction site and the stickers can be placed all around. They are reusable stickers, so they can be moved which is very nice. I love having this in my purse or diaper bag and being able to pull it out when my toddler is having a hard time waiting, like in a restaurant or waiting room. Again, it's small, but it's perfect for on the go entertainment!

Such a good idea, but made very cheaply and so does not work out. The total size of the book is a quarter of a letter sheet. You open the booklet and there are a total of one full sheet of stickers to place on a half-size letter sheet of space. The sticker sheets are stapled inside and the booklet is the image that you place the stickers onto, which is made of a sturdier card stock. The stickers are very thin, easily tears, and are thus NOT reusable. I had to copy and print out multiple pages of the image provided, so as to not spoil the fun. I ordered several of these based on the glowing reviews. I have a 2 and 4 year old and have been through the gamut of books and found much better quality at dollar stores. I am really flabbergasted and suspicious of how highly these books are rated. Save your money and just order a bigger book. We love Roger Priddy books - great quality, very sturdy and vibrant images. He has great content - puzzles, content recognition, letters/numbers, etc. Cannot recommend these highly enough. He even has some editions with CD with all the sticker images on them, just in case you need extras -- torn or misplaced stickers. His books are keepers

after all the sticker fun is done.

We used these as party favors for our son's 2nd birthday party that had a construction theme. We also added some crayons (which were not needed because there's no where to color in these books!) These are perfect for what we used them for.

This series of books is wonderful. My 3 yr old loves creating the scenes of the construction site. As suggested by a previous reviewer- I always remove the center stick sheet so my son can view the entire scene at one time. I then put the booklet and the stickers in a small sandwich bag to keep the parts together when storing.
