# That's Not My Dinosaur (Usborne Touchy-Feely Books)

## Synopsis

A touchy-feely board book with simple, repetitive text, tactile patches and bold illustrations suitable for babies and toddlers. A little white mouse appears on every page, for children to spot. --This text refers to an out of print or unavailable edition of this title.

Series: That's Not My...

Board book: 10 pages

Publisher: Usborne Pub Ltd (June 2002)

Language: English

ISBN-10: 079450129X

ISBN-13: 978-0794501297

Product Dimensions: 1 x 6.5 x 6.5 inches

Shipping Weight: 12 ounces

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (72 customer reviews)

Best Sellers Rank: #41,166 in Books (See Top 100 in Books) #71 in [Books > Children's Books > Early Learning > Basic Concepts > Sense & Sensation](#) #112 in [Books > Children's Books > Animals > Dinosaurs](#)

## Customer Reviews

I've checked out every single one of the books in this series from the library. I wanted to buy a few of these books, but there's so many repeat textures, I wanted some with good variety. I ended up buying this one and 2 others (That's not my Penguin and That's not my Tractor). There are a few repeats, but I don't really mind. I also almost bought That's not my Monkey. That's not my Dinosaur has these textures: body too squashy, tail too fuzzy, teeth too bumpy, flippers too slippery, horns too rough, spines so soft. I really like the pictures of the dinosaurs too...they're all pretty different from each other. These books are super cute and very thick and durable. I've also looked at the touch and feel books by D.K. publishing (Farm, Wild Animals, Baby Animals) and they are definitely not as sturdy as these books. And I love the drawings and the that's not my... concept better too. Great books!!

This was the first book I could read to my son. It is short, which is good for the limited attention span of the 3-4 month old, is so cute, and has interesting, bright simple pictures. He likes grabbing at the

pages, too.

My kids-age 3 and 1, LOVE this book. It features a different dinosaur on every page, with the refrain, "That's not my dinosaur, his..." "horns are too rough", then on the next page it will be "flippers are too slippery," etc., all with the appropriately textured body part. Then on the last page you finally find "my" dinosaur. What makes this better than the standard touch and feel books out there is 1) Durability. The binding is plastic and the pages are super strong cardboard--my other board books are disintegrating but not this one 2) Variety of textures--much better than my "Touch and Feel Baby Animals," or "Wild Animals." 3) Adjectives--while babies and young toddlers can chew on it and touch the textures, older toddlers love learning the adjectives that go along: rough, scratchy, shiny, slippery, soft, etc." 4) Theme: toddlers love having the wrong dinosaur, and finding the right one at the end. (Trust me) The reason I gave 4 not 5 stars is dinosaurs are not the most exciting thing--I'm on-line today buying a baby gift and I'm going to get "That's not my Puppy," or "Kitten" or "Lion."

Beautiful - both in color and texture! For what its worth, we got this book as a gift about 3 1/2 years ago and the newer copy looks / feels a little bit different. I think I like it better... but if you're seeking to replace a belovedly-worn copy, know its not going to be EXACTLY the same.

We love these books and purchased our first one for our wee bout (that's not my tiger) when he was 3 months old. The bright colour and clear pictures are wonderful for very small children and you can help them touch the tactile patches. As they get older they very quickly learn how to identify and touch the patches themselves. My son loved this book, he knew which bits to touch straight away and will sit totally engrossed when we read this to him. At 6 months he is able to hit all of the tactile spots himself. As with all books in this series, the illustrations are bright, clear and uncluttered and the story takes the expected form of that's not my xxxxx it's xxxxx are too xxxxx. Definitely an ideal book for growing young minds.

That's Not My series books are my favorite. I discovered them when my daughter was six months old. She loved the illustrations and the sensory experience of touching the different parts of the book. We purchased this book as part of a gift for a one year old boy. He loved the book and his sister who is learning to read loved that she could read it to him. My daughter who is now three loves reading it to my husband and I.

We also have "trucks" and the textures are very similar. This book is cute but not my personal favorite. Still 5 stars because these books are tough and durable and still cute even if I feel disappointed by lack of content.

This is my 15 month old son's second book in the 'That's not my...' series. He absolutely loves looking through these books by himself, or having my husband or I read them to him, while he flips the pages for us. This book doesn't seem to have as much for illustrations as the That's Not My Monster (Touchy-Feely Board Books) book. All the dinosaurs except for one are on solid colored pages with no decorative background. But, I still think it is a nice little book and he enjoys touching all the dinosaurs. The following dinosaurs are in this book:- a tail that is too fuzzy- teeth that are too bumpy- flippers that are too slippery- horns that are too rough (my son's favorite)- spines that are so soft. The touch material is a decent size, each material is different and not repeated on any other dinosaur either. Between the two books that he does have (this one and That's Not My Monster), I only saw one exact repeat of material (fuzzy), but it was a different color in each book.
