Gallop!: A Scanimation Picture Book

Synopsis

There's never before been a book like Gallop! Employing a patented new technology called Scanimation, each page is a marvel that brings animals, along with one shining star, to life with art that literally moves. It's impossible not to flip the page, and flip it again, and again, and again. A first book of motion for kids, it shows a horse in full gallop and a turtle swimming up the page. A dog runs, a cat springs, an eagle soars, and a butterfly flutters. Created by Rufus Butler Seder, an inventor, artist, and filmmaker fascinated by antique optical toys, Scanimation is a state-of-the-art six-phase animation process that combines the "persistence of vision" principle with a striped acetate overlay to give the illusion of movement. It harkens back to the old magical days of the kinoscope, and the effect is astonishing, like a Muybridge photo series springing into action or, in terms kids can relate to, like a video without a screen. Complementing the art is a delightful rhyming text full of simple questions and fun, nonsense replies: Can you gallop like a horse? giddyup-a-loo! Can you strut like a rooster? cock-a-doodle-doo! Every child who opens the book will be amazed and so will every parent.

Book Information

Lexile Measure: 450L (What's this?)

Series: Scanimation

Board book: 12 pages

Publisher: Workman Publishing Company (November 22, 2007)

Language: English

Age Range: 3 - 18 years

Grade Level: 3 and up

Customer Reviews

I was in Borders children's department and a little girl was fascinated with this book. She kept

moving the page back and forth. I watched her a minute and then asked her the name of the book. I was so captivated with this new (to me) technology that I bought 'Gallop!' for my one-year-old grandson. He is not too young for it and he loves it. He is a careful child. 'Gallop!' is like a flip book, but the pages don't flip, yet the animals move. 'Gallop!' is a very clever and very creative book.

I recent found this book in a gift store in PA and was absolutely amazed to see how the animals move in a lifelike fashion. At first I thought it must be battery operated but as the book has no power source, I discovered that the pictures move in a high tech version of a flip book. You have got to see this to believe it! Everyone who I've shown it to has been astounded! You can't go wrong with this for the holidays. Any child would love it!!!

Any 2-5 year old (and their parents) will love this book. The neat thing about Gallop! (other than the "magically" moving animals) is what it teaches to those tender young readers, that books can be such a delight inside! Little kids will love to turn the pages to see the next animal run, walk or gallop across the page.

I bought this as a birthday present for a 6 year old girl and initially thought that it might be better suited for a younger child because of the simple wording in the text. The moving pictures are so fascinating however that it is hard to put down.

We checked this out from the library ... it was sitting on a shelf and my 4 year old picked it up and WOW! We were mesmerized! But after getting home and reading it once through to them - I was disappointed in the text. It wasn't a pleasure to read - and I find that really important and I spend nearly all day reading to my 4 children! So while the amazing movement in the book was really cool, I am not sure if I'll be buying this because I don't want it to just take up space on our shelves.

We found this book in Toys R Us and it is such a cool book! I still haven't been able to quite figure out how it works because the pictures show such a range of motion I wouldn't think possible. Both my 3 year old and 1 year old look at it over and over again! I've brought it in to work to show (and recommend to other parents) and they're just as astounded by it! I would definitely recommend it - you won't be disappointed!

This wondrous book is one that I gift frequently. Children are entranced by the galloping horse (my

favorite) flying eagle, strutting rooster and all of the animals that come alive in the pages of the book. Adults are pretty impressed too! Rufus Butler Seder is a creative genius, I love all of his scanimation picture books.

A bit more simple than I expected. Other scanimation books have more content and are in color, which attract the interest of my godson more than this one. We still read this to him often and he likes to watch the horse run.
