[Education & Reference > Reading & Writing > Handwriting](#) #39 in [Books > Reference](#)

Age Range: 5 - 7 years

Grade Level: Kindergarten - 2

## Customer Reviews

This is a learning to write book. It has 3 sections. 1st section is the letters of the alphabet, 2nd section has words starting from each letter of the alphabet and 3rd section has sentences. It is thin and there is only one page for each letter. Also you can easily remove the pages and copy them

I have a granddaughter that is on the autism spectrum and developmentally delayed. One of the things she struggles with is getting her letters in uniform sizes with correct spacing . Unfortunately the school does not work with her on these issues. So I got her this book along with a special pencil to help her practice. These "lessons" are just the right length....not too long nor too short. She has a difficult time paying attention for long periods of time. When she sees herself making the letters in the right size, she is so delighted with her accomplishments. For those of you who might be in the

same boat as this grandmother is, I hope this will help you to decide on whether this book has value for your child.

Each page in the first section has the upper and lower case letter on the first row and then 5-6 more rows that are blank for practice. No tracing dots. The second section has 4 words per letter per page to practice. They are traceable once, then independent practice. It would be nice if they were sight words or CVC words. The third section has simple sentences that focus on a letter of the alphabet. The sentence is written once, then the rest of the page is for independent writing practice. The lined paper is nice with cute color pictures. The top and bottom lines are blue with a red dashed middle line. Overall, this is geared towards an early writer. I could see using the book in sections as the writing progresses. The letter practice is always nice, but I would have preferred more traceable letters per page. This book is not for kids who still need to trace.

Great workbook but make sure to make COPIES before using it because theres only one sheet for each letter.

Good workbook. I do wish there was a colorful picture on every page instead of just the sentences in the back. Be aware that there is only one page for each individual letter. I decided to take the pages out and put them in clear sheet protector with rings to keep them together. I have my son practice with fine tip dry erase markers so that he can practice with each page again and again! Very happy with this purchase.

Our daughter is 3 and half and she needed the right way to practice letters. First we taught her writing letters started on Doodle board but after a certain time we needed something unique and best to teach her how to write within lines. In our times we used to practice letters in notebooks with margins and blue and red lines. We searched the same one but in a workbook format and voila we got this Handwriting: Printing Workbook (Brighter Child: Grades K-2 in the same old but best style. The super points about this book -1) Fast delivery - It came so fast.2) Good Build quality- The page quality is really good and does not tear easily. No marks or smudges left after erasing letters. So I can reuse the same page.3)Features- The workbook has 3 stages for practicing handwriting .a) The first stage is for practicing writing letters from A-Z. Each letter is given in a single page in both upper and lower cases.Each letter is shown how to write in traced format in first row. Then you are given a few more lines to practice those. So Practice by tracing the letters and then write the letters.

Practice makes one perfect . This is the bottom line of this workbook. During practice each child easily knows the concept of how to write uppercase and lowercase within top and bottom blue and middle red dashed lines.b) The second stage is for practicing writing words. Here also the same motto. After looking at an example and tracing it, you practice it independently. First practice by tracing the words then write the words.This workbook nicely graduates a child's writing from letters to words.c) The third stage is for practicing sentences. The sentences became long gradually.This book is not only for practicing handwriting it also boosts up a child, self enhances and make him/her independent learner during the vast kingdom of letters and word and sentences.Each page of word and sentence practice has beautiful pictures drawn associated with the word to be written. This will surely be lovable by a young writer.My daughter already knew how to write each letters in both upper and lower cases. But she needed the right direction to write them in an organized way and she got it through this.

This book is awesome for helping with writing. It starts out with the letters of the alphabet, then goes on to writing words. There is a line to help by tracing then room for practice below. My only complaint is that I wish the letters were bigger.

Definitely as described. Wish there was more space and pages for letter practice instead of words and sentences but we do have other books with that. Good worksheets to supplement for extra practice. Couldn't beat the price.
