Live From Beach City! (Steven Universe)

Synopsis

All the hits from Season 1 of Steven Universe! Steven Universe may have inherited his magical abilities from his mother, Rose Quartz, but there's no doubt that his love of music comes from his father, Greg Universe. Now, fans can learn to sing and play all of Steven's favorite songs—from the tunes he learns on his ukulele, to his father's guitar hits, as well as original songs sung by each of the Crystal Gems. This music book also gives kids the tools and inspiration they need to write their own songs!

Part sheet music book, part introductory musical lesson book, part character feature, and part music activity book! This was a fun, unexpectedly thorough collection of the songs from Season 1 of Steven Universe, and the BEST thing about it is that we get to see the intended melodies written out on manuscript paper, with harmonies written in where appropriate, and lyrics and everything. The only place it really falls short for me is that it tried to cram introductory music theory into the first few pages in a way that I do not think is accessible for its intended audience. Someone who can understand these hasty definitions with very few demonstrations or examples probably already reads music, and someone who can already read and write music on the level it requires to write songs probably won't be using the adorable "write a song about ____" prompts to make up their own

tunes in the provided staff paper in the book. (I say this as someone who majored in music education. I think it just didn't take its time enough, and that taking that kind of time to present these concepts is beyond the scope of a book like this.) There are also a couple outright typos, like "time signatue" and "Mini Music Lesson." That surprised me, because those are spell-check-level mistakes that should have been edited out in a major publisher's production. But on to the wonderful things about the book! First, it has an intro from ex-rock star Greg Universe, followed by a really authentic intro from Steven where he tells you there are a bunch of different ways to experiment with music.
