Baby Bear, Baby Bear, What Do You See? Board Book (Brown Bear And Friends)

Synopsis

"Baby Bear, Baby Bear, What Do You See"? is the final collaboration from this bestselling author-illustrator team. Young readers will enjoy Baby Bear's quest to find Mama, and they'll revel in identifying each of the native North American animals that appear along the way. The central focus on the special bond between mama and baby makes a fitting finale to a beloved series. Now in board-book format for the youngest readers.

[Animals > Bears](#) #102 in [Books > Children's Books > Classics](#)

Age Range: 2 - 5 years

Grade Level: Preschool - Kindergarten

Customer Reviews

This is a wonderful book for toddlers and older children. It has charming Eric Carle illustrations and covers a variety of North American animals such as skunks, deer, and prairie dogs. The amount of text is perfect to engage the interest of young children, while the North American animals capture the attention of older children. Highly recommended.

"Baby Bear, Baby Bear, What Do You See?" asks the title character and, more importantly, the young reader/listener what they see as they turn through the pages of this wonderful book. Like "Panda Bear, Panda Bear, What Do You See?," this book is filled with brilliant, big and colorful pictures from Eric Carle. Bill Martin, Jr. focuses this story on North American animals, making it a bit

more interesting for the kids and their parents here in the good ol' U.S. of A. I've actually seen a few of these animals in the wild thanks to the National Park system and a few trips around my home. The text is familiar territory for parents and kids who've read other books by Martin, Jr. This wonderful rhythmic writing makes it easy for kids to read and, even better, more fun to listen to. I highly recommend this book. It's fun for all ages.

My baby absolutely lights up with these pictures and the cadence of the story. I probably in retrospect would have bought the board book because she wants to eat the pages. (7 month old). Other than that she loves the book and the pictures.

Our little one Loves Brown Bear so, I wanted to get her a follow up and after reading the options, choose this one. I knew it was going to have unique animals, but I didn't realize how unique they would be. Flying squirrel?! I'm sure she will love what unique animals it details when she is a bit older, but being only 18 months, she isn't really into them. The illustrations lack the bright colors of Brown Bear. When we read Brown Bear we do the animal sounds for each page and with this one, that isn't really an option. Still satisfied with my purchase, but probably should have chosen one of the other sister books for our preference.

My 4 year old's favorite book!! He asked me to read it to him every night for a week and to my surprise one day he was actually able to read the book back to me. Great story line, lots of repeatative words that gets the kids to recognize the words added bonus they are Remembering sight words :)

This and Pout Pout are my toddlers favourite books. They are a joy to read and my daughter smiles every time I read the What do you see and What do you Hear books by Martin and Carle. I will buy every book in this series.

The pattern of the story is the same as Brown Bear, Brown Bear. But, different enough that it creates a new interest. Instead of each new animal "seeing " the next animal, they each transition to the next in a physical action of their own.

Little ones love this book! My niece and nephew listened attentively to this book when they were 3 months old, and older. They never took their eyes off the pages. Older little ones love it, too. The

baby animals are cuties, and the pictures are so bright and fun. It's a wonderful 4th book in the Brown Bear Trilogy!
