Megafast Motorcycles

Synopsis

Motorcycles are made for speed but some get there louder and faster than others! You'll need your toughest gear to ride the turbo-charged MTT Turbine Superbike Y2K perhaps the most powerful (and expensive) road bike ever. Blow past speeds of 200 mph (320 km/h) with the Kawasaki Ninja of the Night. Ride the world's fastest production motorcycle, the Suzuki Hayabusa, and hit 188 to 194 mph (303 to 312 km/h). Hang on tight as detailed illustrations take you on the road, around the track, and across salt flats on these powerful bikes. Get the latest facts on how they reach those extreme speeds and stay on the road.

Book Information

Lexile Measure: 1020 (What's this?)

Series: Megafast

Paperback: 32 pages

Publisher: Hungry Tomato (March 1, 2016)

Language: English

ISBN-10: 1467795836

ISBN-13: 978-1467795838

Product Dimensions: 6.5 x 0.3 x 8.8 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (2 customer reviews)

Best Sellers Rank: #2,165,781 in Books (See Top 100 in Books) #45 in [Books > Children's Books > Cars, Trains & Things That Go > Motorcycles](#) #796 in [Books > Children's Books > Science, Nature & How It Works > How Things Work](#)

Age Range: 8 - 11 years

Grade Level: 3 - 6

Customer Reviews

Everyone knows that motorcycles are fast, but some of the fastest motorcycles today are scarily fast. • If you are thinking some might race upwards of 100 mph, think again because some of them can race more than 200 mph! When we think about speed • we generally think in terms of miles per hour or mph. If we have a superbike that takes just 2.9 seconds to get from a standstill to 60 mph • you're talking about a megafast motorcycle. You're going to meet plenty of them in this book, megafast bikes you probably never knew existed. We do expect motorcycles to be fast, but megafast sounds pretty cool, but pretty scary as well. Yep, there are megafast motorcycles out

there ... lots and lots of them! One of the fastest is the Flying Tomahawk. Now this motorcycle can practically fly and Dodge claimed its megapowerful engine would slam it up to 420 mph. Now that's a bit of a stretch and since no one has ever really tried it, we'll never know, but it is a megafast motorcycle. The engine is an 8.3 liter, V10 twin-turbocharged monster so that will tell you something about its power. FLYING TOMAHAWK SPECS: Power: 500 bhp 0 - 60 MPH: 2.9 seconds Top Speed: 420 mph (in your dreams) Engine: 8.3 liter, V10 twin-turbocharged Torque: 525 lb-ft Price: \$550,000 The Flying Tomahawk might be all talk and no action, but the Honda Humdinger, the Super Blackbird, is as megafast as its name. It was the world's fastest bike, with a rip-roaring top speed of 178.5 mph. That is until the Suzuki Hayabusa came along, another megafast motorcycle featured in this book. Its long, sleek, ultra-cool look is patterned after the Lockheed SR-71 Blackbird reconnaissance jet that flew during the 1970s.
