# Inch By Inch

## Synopsis

In this classic book, a winsome, winning inchworm is proud of his ability to measure anything under the sun.

## Book Information

Lexile Measure: 210L (What's this?)

Paperback: 32 pages

Publisher: HarperCollins; Reprint edition (September 21, 1995)

Language: English

ISBN-10: 0688132839

ISBN-13: 978-0688132835

Product Dimensions: 9.2 x 0.1 x 10.8 inches

Shipping Weight: 4.8 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (50 customer reviews)

Best Sellers Rank: #31,597 in Books (See Top 100 in Books) #93 in [Books > Children's Books > Animals > Bugs & Spiders](#) #105 in [Books > Children's Books > Animals > Birds](#)

Age Range: 4 - 8 years

Grade Level: Preschool - 3

## Customer Reviews

Once upon a time there was a cute, little, green inch worm hanging out on a piece of grass. One day, a robin came up to eat him, but the inch worm talked the robin into letting him measure the robin's tail. Being such a useful worm, the robin did not eat him, but took him to other birds so that they could have something measured by the smart inch worm. Finally, a nightingale told the worm to measure his song or he would eat the little inch worm. Using his little worm brain, the inch worm began measuring the song until he had inched away to safety. This wonderful book, written and illustrated by Leo Lionni, won the Caldecott Honor in 1961. He has taken a little worm and made the reader fall in love with it through the worm's usefulness in measuring and his cunning ability to escape the hungry nightingale. Even though there are many different scenes, with many various shades of green on them, Lionni has illustrated the little worm in such a way that the reader can always point him out. Children would enjoy finding the worm on each page, especially at the end of the book when he is hiding from the nightingale. Also, we always see the story from an outside perspective; eye level with the grass. It is as if we are another small animal looking in on the story. The background of each page is pretty much the same. All Lionni has illustrated on each page

is the worm and the other details that are needed during that part of the story. For example, while the inch worm is measuring the legs of the heron, Lionni has only portrayed the heron with the worm inching down its leg. I think this technique is good for younger audiences because it helps children focus on the story and keeps their attention for more specific details.

This is the story of one very smart little inchworm. As the story begins, he is about to be an addition to a robin's meal as the robin is hungry and the little inch was quite available. But unfortunately for the robin, this was one fast thinking little worm and he convinces the robin that he is a very useful creature. He offers to measure the robin's tail. Of course the robin is quite impressed (he found that his tail was five inches long, which pleased him greatly) so he takes the little worm to the other birds. And so the measuring begins; a flamingo's neck, a toucan's beak, legs of a heron and a pheasant's tail. This goes on until the nightingale arrives and demands that his song be measured or he will eat the little inchworm. Is disaster about to befall the little green guy? How on earth do you measure a nightingale's song? Is our little measuring worm about to become a meal and is there no escape? Well folks, you have to remember that this little worm is a bright little worm and his thinking ability under pressure certainly surpasses mine! All ends well, but you will have to read the story of how the singing bird was outwitted. Of course this Caldecott award winning author has not slacked off on his illustrations one bit. They are as colorful, as original and playful as any of his other work. The combination of Lionni's words, story telling skills, ability to simplify the complex and his beautiful art work are truly amazing. I am not sure how he was able to sustain his high quality output over the years, but he certainly pulled it off. This little work is ideal for the classroom or personal library. There are so many lessons to be learned here...thinking fast not being the least.
