# Super Bug Encyclopedia

## Synopsis

Following on the success of Super Nature Encyclopedia and Super Human Encyclopedia comes Super Bug Encyclopedia – a look at the 100 most amazing insects on the planet! Using macro photography and brand-new CGI artworks, Super Bug zooms right in to reveal the secrets of the most successful creatures on our planet. With incredible facts and stats for every bug, Super Bug showcases the superstars of the insect world. Find out which insect can snap a pencil in half, how a tiny moth can fly up to 70 miles an hour, and meet a dung beetle that can pull over 1,100 times its own body weight. Young readers will be wowed by what goes on inside the tiny world of ants, spiders, butterflies, moths, crickets, and other creepy crawlies. Lively, informative, easy-to-access text based on the latest discoveries and scientific research showcases incredible feats of endurance, defense, strength, and speed while graphic, dashboard-style panels provides information at a glance. Visualized with incredible 3-D models with cross-sections and strip layers, readers can explore every essential detail of the world of insects in Super Bug Encyclopedia.

## Book Information

Hardcover: 208 pages

Grade Level: 3 - 7

## Customer Reviews

The book is divided into five sections: Amazing Anatomy, Animal Athletes, Fearsome Hunters, Tiny Terrors, and Life Stories. Each of these sections will highlight a specific bug that can be found around the world. For example, on the two pages about the emperor scorpion you will get a quick overview of the bug, see its cross-section with advance graphic, meet its deadly relative, learn more

about it and get all the stats and facts on the bug. Did you know that a female scorpion may give birth to as many as 100 live young and that she will carry them on her back. Impressive! If your child desire to learn more about bugs, this is definitively a book to discover with him or her.

Grandkid loves Birthday gift.
