I bought this book for my son, who turned 2 in December. He loves the book and can easily find the items. I would not buy this for a child over 4, because it is intended to be pretty easy. For my 2 year old, though, it is perfect. The book is very large and sturdy, which is also great for a 2 year old. He reads it over and over, and seems very proud of himself when he finds the items. We have an Elmo/Sesame Street book just like it that my daughter used at his age and that my son also enjoys. I think these books are great purchases.

Buy "Mickey Mouse Clubhouse: On The Go" instead if you're looking for a Mickey-themed First Look and Find. The illustrations in this book range from boring to so busy they're blinding. The style of illustration used makes some of the pictures run together and difficult for a toddler to discern, especially in the "Spring Cleaning" and "Willie's Toys" pages. The first page is has so little on it that any toddler will find the items immediately. My family owns 7 of these books (this one plus MMCH On The Go, Sophia the First, and four Elmo/Sesame Street iterations) and I think all the others are great. The pictures are big, brightly and clearly illustrated, have scenes that toddlers can comprehend, and there is a lot to see on each page. Even though my child can easily find the given items now, there's still so much to talk about and look for on each page of those. Not this one. Skip it and buy a different one.

Our 2 year old got this as a b-day gift. she LOVES Mickey so this was a big hit. We have another "first look and find" book and she also loves it. so the basic concept of this series works for us. the big surprise was reaction of our 7 m old son. generally he has marginal interest in books. But when he saw this book he garbed it out of the hands of our daughter and refused to let go. this is a big bulky heavy book it is almost as big as the baby (he is a small baby). Now he is very much hooked on this book and loves looking at the pages. this is a good book to have.

This "I Spy" or "Can you find" was well received by a 2 year old who loves everything Mickey Mouse. Mickey Mouse Clubhouse books seem to be colorful and entertaining. Mickey has never lost its popularity from days of our childhood to the present, despite all the modern technology and toys today. I am giving it 4 stars, because it was a gift and I didn't actually observe the child with the pages. Some people seem to feel this was not as preferable as a few other Clubhouse books, so that is why I gave it a 4.

My daughter loves this book. It has very bright and vibrant pictures and keeps her busy during longer car rides. It is a large book in height, but very well built with thick cardboard pages and vinyl-ish cover. Micky Mouse clubhouse characters and themes make this a really great book for fans of the show. I wish they had more of these with other characters from other shows because this is a great look and find!

Very colorful and well made. The pictures and illustrations are fantastic. Unfortunately by the time our son was able to enjoy the 'where's x' type of book this was just too simple for him (around his 2nd birthday). He read through it once and it was discarded. Toys R Us has the same book, cheaper, and it comes with some other neat things as well as a set.

My son and I LOVE the Disney look and find books. This one is very cute. He is 3 and can find all the items. But we have been suing them since he was very young. These books help with vocabulary. My son used to point at all the pictures for me to tell him what each item is. Very cute book.

I bought this book for my 2 1/2 year old daughter because she LOVES Mickey Mouse Clubhouse (it is the only show she will sit down and watch) and also loves pointing out and naming things in books. She loved finding the items/characters on each page. I was worried it would be too easy at because the first pages just have the characters and they are big and obvious, but the pages get a little trickier as they go. The items get more common (mop, canteen, etc) and smaller, so she had to look a little harder to find them. When she struggled, there were characters on the pages she recognized, so I could say, "Look by Goofy," to help her out when she was stuck. She also learned new words from me saying the name of each item for her to find. The downside? She wanted to do this over and over and over and over again because she loved it so much! And then she started to memorize where everything was!! I would definitely recommend this book to anyone with children ages 2-3. I will be purchasing more of these (and some of the normal Look and Finds as well for a bigger challenge). I think I'm going to purchase the Disney Princess one next.
