# Head, Shoulders, Knees And Toes...

## Synopsis

This award winning series has been specifically designed for babies. A great introduction to books through well-known nursery rhymes and interactive text. Singing songs and rhymes is the perfect way to bond with your baby and share quality time. It also aids language development by introducing them to the natural sounds and patterns of speech. Combining these with actions also stimulates the brain and helps muscle development.

## Book Information

Series: null

Board book: 12 pages

Publisher: Childs Play Intl Ltd; Brdbk edition (October 2002)

Language: English

ISBN-10: 0859537285

ISBN-13: 978-0859537285

Product Dimensions: 0.5 x 8.2 x 8.2 inches

Shipping Weight: 6.4 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (530 customer reviews)

Best Sellers Rank: #2,458 in Books (See Top 100 in Books) #93 in [Books > Children's Books > Early Learning > Basic Concepts](#)

Age Range: 1 - 3 years

Grade Level: Kindergarten and up

## Customer Reviews

At first glance, this book appears to be simply an illustration of a kids song. Some reviewers have complained that that's all there is..so why buy it. But actually, there is a lot more there if you look. First of all, while illustrated songs seem like an odd choice sometimes to adults, little kids LOVE them. Invariably, they are the ones my two year old brings to me again and again. They are also the first books that kids are able to memorize. This is important because they like to pull them out when they are playing independently, and model reading on their own. What a satisfying experience for a pre-reader! Plus, for parents for whom it doesn't come as naturally to bring music into their children's lives, these sorts of books are a great way to do so. This book does an excellent job of being really clear with the pictures lining up the words and the body parts. The first line, she gives each body part it's very own page, so that they can be large and really obvious -- the little animal on the page mirroring the same body part as the baby is also very adorable. When she gets to eyes,

ears, mouth and nose, she adds another dimension by putting in item on the page that you can do with that body part -- for eyes - books, for ears - baby instruments, for mouth - baby food and sippy cup, and for nose - flowers. So there is a discussion element if you are reading this with your baby and choose to take it. The back of the book has the last "knees and toes" echo...pretty cute, and also has the whole song written out under a staff with musical notes. My older daughter has taken to grabbing this 'baby' book and asking how to pluck it out on her little piano keyboard. So the book can have a second life for that purpose later on. The pictures of the babies are endearing.. I love their happy little faces. It is worth noting that while the babies are definitely different "shades" -- it's hardly what I'd call multi-cultural, which is a shame because there's no reason why it couldn't have been. She did throw in a couple girls. All and all, if the multicultural issue doesn't concern you, I'd recommend this highly for your own little one, or for a gift.

My husband and I were trying to teach our daughter where her eyes, nose, mouth etc were. My husband has never heard this song so it was hard for him to do with our daughter. I found this book and now this is daddy's book to read. Within a week our daughter knows where her body parts are and how to say and she loves reading it with her dad. I would recommend this book.

I love this book. My nephew really likes these board books and the creativity in illustration is great.

Because of the utter simplicity of this book, I was surprised at how quickly it became one of my grandson's favorite books (along with the Row, Row, Row Your Boat, by the same author.) I guess babies all enjoy looking at other babies. I have since ordered these two books for my friend's granddaughter, and she had the same reaction.

There isn't much to this book except for the very cute and colorful illustrations. The story line, if you want to even call it that, is just the lyrics of the "Head, Shoulders, Knees and Toes" song put into a board book format with pictures to illustrate. The book is short and doesn't have a whole lot to it. My baby still enjoys the pictures but she enjoys all her books. This book is quite large for a baby board book and isn't easy to hold and maneuver for my 8 month old. She prefers her other books and so do I. It's cute but not a winner.

Our 1 year old nephew loves this book and it's perfect for teaching

I purchased this book for my son when he was 15 months old and he loves this book. He brings it to me to read to him over and over again. The illustrations are fun, he loves the song, and he knows all the body parts now. Many times I have seen him flipping through the book on his own "studying" the pictures. Given I don't usually pay to buy new books that cost more than a dollar or two, this one was definitely worth it!

My niece just loves this book! She is 9 months old and this is the book she always wants to have read to her, or the book she chooses to just look at the pictures.
