National Geographic Readers: Tigers

Synopsis

With their bold black stripes, powerful presence, and fierce faces, tigers are just about the coolest animal on the planet. These giant jungle cats can climb trees, swim, and run in sprints up to 32 mph--making them a predatory nightmare. Ranging from the warm climates of Southeast Asia to the frozen tundra of western Russia, these solitary hunters will devour whatever animal they catch. In this level 2 reader you'll learn all you ever wanted to know about tigers and so much more.

Complete with fascinating facts, beautiful images, NGR Tigers can't miss. National Geographic supports K-12 educators with ELA Common Core

Resources. Visit www.natgeoed.org/commoncore for more information.

Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

My son's reading and comprehension skills have really grown since reading this series! The books are well written. They are balanced with knowledge, entertainment, and great photographs! Highly recommend!

National Geographic books are perfect for teaching little ones about the world. I have purchased all

of them for my grand-daughter, and they never disappoint, highly recommended for children of all ages.

He is pre-K & just learning to read. The tiger is his favorite animal. Note to the squeamish: The author keeps it real & doesn't present them as cute over-grown pets. They're predators and there's a picture showing a tiger with his just-caught meal. Not gruesome but certainly factual. I think Laura Marsh is one of the best children's book authors ever. Her series presents various creatures gently but factually as they really are. She knows how to keep the interests of the 4-8 year old set which is a talent few adults possess. I'll be looking over some of the other authors in the National Geographic children's books. But for the time being I think her books are so good that I'll buy them all first.

My 6 year old needs to read non-fiction books as part of her school curriculum. The National Geographic Series of leveled readers has been great. We started at 1 and now can do both levels 2 & 3. They sometimes introduce vocabulary terms specific to the animal or topic which I need to step in and help define, but other than that they can be read all on their own.

We own quite a few of the national geographic readers and we love them all. They are appropriately laid out for young readers, my daughter loves the riddles/jokes and she loves learning interesting facts about the animals and sharing them with the family. I am very pleased with this purchase and will continue to buy others in the series.

Wonderful book about tigers! I learned a lot of facts about tigers that I didn't know, and I'm sure that the student who received this book (requested book about tigers and jaguars -- BIG cats) found the book interesting. Age appropriate reading level for elementary school children.

My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones. The "pre-readers" level books are extremely simple & great because she memorizes the words & can "read" it herself. We love the more advanced ones too, because there is more information to talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable & pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

The book is darling and the info, pictures, etc were great, but I was expecting just that: a book. It was just this little magazine read. My son read it in a few minutes. I'm sure that info was listed somewhere, but I seemed to have missed it. He and I were both pretty bummed at how small it was. That being said, he does enjoy having another item to add to his tiger collection.
